

Hiring Manager

January 29, 2024

TD BANK, CANADA

Re: Senior Front End Angular Developer

Dear Hiring Manager,

I am an experienced FrontEnd developing with strong focus on Angular, RxJS, Angular Material, Flex Layout, SCSS, Grid CSS, BEM, HTML5.

I have worked multiple industries, including bank, on the FrontEnd development with best practices. I joined RBC in early 2021. Despite being with the team short time, I have managed to implant myself into the team and culture at Ventures. My positive attitude, sharing, willingness and interested in learning have been a welcome contribution.

I am always trying to fully understand the tasks and concepts before diving in and knows when to ask for help. My questions are usually well thought out and comprehensive. As a collaborator, I collaborate with developers, designers and product owners to deliver better stories.

I like to work in TD bank, as it fosters diversity, collaboration, and equality.

Thank you for your time and consideration!

Sincerely,

Alice Zou
