Summary

Experienced software developer with master's degree in computer science. 2+ years experience of full time front-end web development, specializing in AngularJS, Angular 8, HTML5, CSS, Bootstrap. Super nerd who loves Linux and OS X and enjoys customize all of the development environment. Interested in devising a better problem-solving method for challenging tasks, and learning new technologies and tools if the need arises.

Education

McMaster University MASTER IN COMPUTER SCIENCE (GPA: 3.8)

2015 - 2017 *Hamilton, Canada*

McMaster University VISITING STUDENT IN THE DEPARTMENT OF COMPUTING AND SOFTWARE

2014 - 2015 *Hamilton, Canada*

Highlighted Qualifications

- Solution-focused, take initiative to work effectively within established guidelines
- Strong organizational, time-management and analytical skills
- Solid computer science knowledge and programming skills
- Excellent written / verbal communication and professional maturity
- Excellent team player - proven ability to work both independently and collaboratively within a team environment

Work Experience

DF/Net Software

Dundas, Canada

SOFTWARE DEVELOPER

Jan. 2018 - Present

I am a core member in the software development team that is responsible for creating a Clinical Trials Data Management System. I have led DFweb development, the web solution in DFdiscover suite. I designed the software architecture for DFweb, developed numerous features - data collection ability, query function, document management, and edit checks, built the next generation of our product, used by over 8000 users. I presented in DFUG 2018 to exhibit DFweb and then made the first release of DFweb. I wrote DFweb user guide documentation. DFweb is mainly developed using AngularJS, Angular 8, HTML5, CSS, Bootstrap 3, Web Assembly, and Restful API.

McMaster University

Hamilton, Canada

RESEARCH ASSISTANT

July. 2017 - Nov. 2017

My responsibility is to design a web-based visualization platform for Canarie Intrusion Detection System, which uses a PAC (Presentation-Abstraction-Control) software design architecture. I use Node.js as the backend, Angular, HTML5, CSS3 and Material Design Lite as the frontend, and Elastic stack (File beat, Logstash, Elasticsearch, Kibana, TLS connection, RabbitMQ) as the database search solution. Log source files come from the Bro Intrusion Detection System.

Professional Skills

Programming Angular, Javascript, Typescript, Node.js, Elastic Stack, MySQL, Java, Python, C/C++,

Digital Design Corel Painter Essentials 6, Gimp

Presenting/Teaching Education 750: Principles and Practices of University Teaching. (Certificate in 2015 from McMaster)
